

CORPORATE PARTNER OPPORTUNITIES

RISE

\$2,500

SAMPLE IMPACT: Basic necessities for 87 men during their first two weeks in the program.

Men entering our doors - often with nothing but the clothes on their back - have made the courageous decision to **rise** from the depths of their addiction through sobriety, work, and accountability. They have hope, but no basic necessities for daily living. This level of partnership would provide 87 men with peace of mind and the ability to focus in the early days of their recovery knowing their food, toiletries, and clothing items are covered until they can become self-sufficient. 99% of Step Denver residents obtain full-time employment within one month.

RECOVER

\$5,000

SAMPLE IMPACT: Budgeting, life skills, family reconciliation, and health classes for 80 men.

The disease of addiction can destroy every part of a man’s life. Men enter Step Denver feeling broken and defeated, yet ready to **recover** and experience transformation. This level of partnership would make it possible for us to provide a robust program centered on rebuilding eight areas of wellness in the lives of 80 men. Over the course of six months they will receive finance and budgeting classes, family reconciliation therapy, life skills education, and health and nutrition classes led by industry professionals. As a result, men re-enter the community restored and prepared.

ACT

\$7,500

SAMPLE IMPACT: Workforce development and tailored career coaching for 37 men.

The power of work – being rewarded for one’s responsibility and effort – is an essential part of lasting recovery. Our Career Counseling Manager (CCM) equips residents with the tools to **act** on their own behalf. This level of partnership supports educational workshops, one-on-one career coaching, resume development, and interview training for 37 men. The CCM provides ongoing guidance for professional advancement and long-term career goals, making it possible for our men to achieve sustained stability through self-sufficiency - a key contributor to long-term recovery.
